Notes:

1. We recommend that students take BC1001, but a student with accepted AP/IB credit can take another PSYC course in its place.
2. Note that PSYC BC1001, B1020, and BC1001 are prerequisites for almost all other PSYC courses. Check the BC Course Catalogue.
3. Group 1 & 2 labs must be taken concurrently with their respective lectures. BC1010 can accompany BC1001, or be taken after; but must be *before* Group 1& 2 labs. Note that NSBV BC2001 can be used as a Group 1 lab but be aware of its many prerequisites.
4. Submit the *Senior Requirement Declaration Form* to the Dept. Admin by the semester drop date.
5. Only two semesters of these courses may count towards the major: PSYC BC3465/66, BC3601-3608, BC3617/18.
6. The cognate course must be one of the courses the College approves as satisfying General Education Science Requirements for the Foundations Curriculum (check the list in Slate).

General Guidelines:

- At least 6 of the 8 PSYC courses worth 3 or more credits each must be taken at Barnard or Columbia.
- A letter grade of C- or better must be earned in all PSYC courses applied to the major. Any required courses from outside of Psychology can be graded P/D/F, as long as a student receives a “Pass.”
- A student cannot receive credit for two courses that are considered to be equivalent. (Refer to our *Overlapping Courses* list.)
- A single semester of a course cannot count toward more than one major requirement.
